

# GO KART

ELECTRIC GOLF

**STYLISH, ROBUST AND UNBEATABLE VALUE**

# TECHNICAL DATA

Weight:	Trolley 7.6Kg, battery 6.5Kg (18 hole), 9.2Kg (36 hole)
Folded size:	26x58x61cms (HxWxL)
Motor and motor controller:	12V permanent magnet DC motor, 230W output. Controlled by a microprocessor driven motor management system
Drive system:	Drive is transmitted through a patented, high efficiency gearbox, incorporating an integrated differential and clutch mechanism
Frame:	Various thermoplastic polymers with glass reinforcement in parts critical to strength

## WHEN YOU'RE LOOKING FOR A NEW GOLF TROLLEY, WHAT'S REALLY IMPORTANT TO YOU?

We suspect that you'd like it to be light, but at the same time robust and powerful. We also reckon that you'd rather it didn't overwhelm your car boot, but nestled tidily in a corner. We definitely think you don't want to spend a small fortune on it, but still want to be assured of quality, reliability and performance. And maybe you'd rather it was made here in the UK? These were all must haves when we sat down to design the GoKart.

Yes, it is a little different – but different in a good way. A new style British trolley that's quickly gaining quite a following on fairways worldwide. The choice of materials (glass reinforced polypropylene), alongside the most modern manufacturing methods gave us huge freedom in the design stakes, resulting in a trolley that looks great and performs even better. Take a look for yourself...

## OPTIONS

You can customise the GoKart. The frame is made in sensible black; good and practical, but you can brighten it up. Choose a highlight colour for the battery cover, frame lock and speed adjuster; green, red, blue or pink. Or if you'd rather keep a lower profile, you can now specify black for the battery cover too – this looks rather smart

actually, as well as allowing you to creep up on opponents without being seen (only works in twilight).

There are two battery sizes to choose from. We recommend the 18 hole battery for most people. It's more than enough for one round on any course, and is fine for the occasional 27 holes

too. There's a 36 hole battery for golfers who can't get enough, but as it's quite a bit heavier, the extra cost is only justified if you regularly play twice a day. A third alternative, which gives the best of both worlds, is to get two 18 hole batteries.

## USING THE GOKART IS **SO EASY**, IT MAKES PUTTING A TEE IN THE GROUND SEEM DIFFICULT

It unfolds in one-piece, the battery clips into place (without any fiddly connector shenanigans), on with your golf bag and you're striding towards the first tee.

There are two controls on the handle; an on/off switch and a roller to adjust the speed. These are used in combination – you set the speed to your pace and simply turn off to stop. When you flick the switch back to on, the GoKart will smoothly accelerate back to the same speed.

After play it just folds down to a neat little nugget in your car boot. The

wheels are quick release for storage if necessary – sometimes useful if space is extra tight.

There's no maintenance, you just charge the battery after you play. It won't scratch or corrode. The tough frame is even UV stabilised up to desert conditions.

## GOKART ACCESSORIES

Other accessories as well as those shown here are in development. Keep an eye on our website for news. You can sign on to our mailing list and we'll send you the odd message to keep you up to date.

### TRANSIT BAG

The GoKart Transit Bag; be kind to your car boot. Made with care to be tough, hard wearing and in just the right dimensions to let your GoKart nestle comfortably between rounds.

### GO KART SEAT

The GoKart Seat; simple, pared down design that provides a perch just when and where you need it. Fitting is simple (to either side of your GoKart).

### GO KART UMBRELLA HOLDER

Our brolley holder is a clever little widget that is compatible with all GoKarts. When not in use it's unobtrusive and doesn't get in the way of folding the trolley.

## GO KART GOLF BAG

Designed to fit and complement your GoKart to a tee, our cart bag is the perfect partner.

Available in all four GoKart colours with practical well thought out features.

Subtly logo'd, so you don't feel like a walking billboard, and laid out so all the pockets are easily accessible with lots of storage space. All in all thoroughly desirable.

- Insulated pocket
- Dry pocket
- Outside putter well
- Fourteen top dividers
- Four full-length horizontal dividers (no spaghetti shafts!)
- Chunky grab handles
- Outside ball/pen/tee holders
- Strong zips and tough nylon finish
- Clip on top rain cover

## SERVICE

Possibly because we're power-crazed megalomaniacs, or maybe because we like getting it right, not only do we sell you the trolley we service it here too. The GoKart is covered by a two year's warranty (the battery is one year). If there's a problem with your GoKart 'phone us and we'll get to the bottom of it. Whether you're in warranty or

not, we lend you a GoKart to keep you on the road whilst your own is being sorted out, completely free of charge. Service work is given absolute priority. We might sound a bit daft sometimes, but quality of service is something we're very serious about.

## ABOUT US

GoKart is a privately owned UK company with its factory and headquarters near Canterbury in Kent; strategically placed near Royal St. George's, Royal Cinque Ports, Littlestone as well as some cracking inland courses. As you may have gathered, we're keen golfers ourselves, and we've been in the

business of manufacturing and selling powered golf trolleys for more than twenty years. We're committed to giving customers the best service we possibly can, and also to running a business that's fair, dynamic and makes the hours of nine to five downright enjoyable.
